Science 277, 1453-1462, 1997
A; Title: The complete genome sequence of Escherichia coli K-12.
A; Reference number: A64720; MUID:97426617
A; Reference number: A64720; MUID:97426617
A; Actatus: proliminary; nucleic acid sequence not shown; translation not shown A; Molecule type: DNA
A; Residues: 1-625 <BLAT>
A; Residues: 1-625 <BLAT>
A; Experimental source: GB:AE000449; GB:U00096; NID:92367269; PIDN:AAC76745.1; PID:917901
A; Experimental source: strain K-12, substrain MG1655

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Appli
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                   1 MAMVFPSLVNGYDVAATMAA......IEAGANLLNVAKKEAVPATP 468

Sequence 2, Application US/08933891
Patent No. 6096708
GENERAL INFORMATION:
APPLICANT: Payne, Jewel M.
APPLICANT: Sick, August J.
TITLE OF INVENTION: No. 6096708el Bacillus thuringiensis Isolate
TITLE OF INVENTION: Active Against Lepidopteran Pests, and Genes Encoding
TITLE OF INVENTION: No. 6096708el Lepidopteran-Active Toxins
NUMBER OF SEQUENCES: 8
CORRESPONDENCE ADDRESS:
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            13;
